Practice D: Stop, Look, Organize

Organizing your things makes your surrounding neat and pleasing.

How is your study place in the house? Have you cleaned it lately? Is it organized? How does an orderly study place help you in studying?

I've recently cleaned my study place in my house, it's on my room. I have the time to clean it recently since it's the holy week and I have free time to do it. In my journey in the past few years, I have been particulate in improving myself. I believe in the quote, "If you have a clean environment, you also have a clean mind". This will help you focus at your work and not worry about the clutter in your room that much. Your also helping our environment by cleaning your surroundings and make your brain function better. Being organized might be a pain in the process while doing it, but in the long run, this will help you find certain items much faster and more efficiently.
