Section: 10-Hawking

Let's Try This

Suggested Time allotment: 20 minutes

Career Hunt

Are you familiar with the different industries where a broad category under which several career titles can fall? Let us begin this module through a word hunt activity.

1. Identify the 15 Types of Industries that are included in the puzzle. Write your answers on your HG notebook.
2. After which, answer the processing questions below.

Processing Questions:

1. Were you able to find all the hidden industries? Yes
2. Which of the industries will your chosen career fall under? Technology
3. What is the importance of knowing the types of industries when planning for your career? It's better to get an overall general view on what industries you can be in based on your career choice.

Let's Explore This

Suggested Time allotment: 30 minutes

Wanted: Career!

Now that you have identified some of the different industries from the previous activity, your task now is to relate it with your chosen career.

1. From the list of industries, you listed from the Career Hunt activity, choose one that you are most interested to be part of in relation to your chosen career.
2. Identify at least three professions in your chosen industry and the qualifications, skills, and competencies for the identified careers. You may search the information from the internet, job listings or ask the help of your family members.
3. Copy and complete the activity on a sheet of paper.

Industry: Technology		
Career/Profession	Qualifications	Skills/Competencies
Software Engineer	BSIT/BSCS	Technical Skills, Communication Skills, Problem-solving skills
Server Administrator	BSIT/BSCS	Patience, Maintaining, Debugging and problem-solving skills

Processing Questions:

1. Do you think you are fit with the necessary qualifications of your chosen career based on your own skills and competencies?
Yes, since I had interest in it, I slowly learned the necessary skills and build up my knowledge with it.
2. Was the activity helpful to you in choosing your future career? How?
Not really, it only helped me that there's other option if for whatever reason my current career choice didn't work out as I plan or anticipated it to be.

You Can Do It!

Suggested Time Allotment: 60 minutes

"Career Assessment"

Now that you are already aware of the skills and other qualifications about the different professions in the industry related to your career choice, you need to identify now your own skills, interest and future career plans.

1. Accomplish the Career Assessment Sheet by answering the given questions for each item.
2. Copy and complete the activity on a sheet of paper.

Name: <u>PAUL GERALD D. PARE</u> Grade & Section: <u>10 - HAWKING</u>		
CAREER ASSESSMENT		
1. Career Interest Areas that best suit me at this time are:		
<input type="checkbox"/> Artistic	<input type="checkbox"/> Plants and Animals	<input type="checkbox"/> Business
<input checked="" type="checkbox"/> Scientific	<input type="checkbox"/> Military	<input type="checkbox"/> Social Work
<input type="checkbox"/> Mechanical	<input type="checkbox"/> Spiritual Vocation	<input type="checkbox"/> Agriculture
<input type="checkbox"/> Industrial	<input checked="" type="checkbox"/> Engineering	
<input type="checkbox"/> Others	<input type="checkbox"/> Personal Services	
2. Occupations and related occupations that interests me are:		
<u>SOFTWARE ENGINEER AND SERVER ADMINISTRATOR</u>

<input type="checkbox"/>	Attend Career Orientation	
<input type="checkbox"/>	Others _____	

Processing Questions:

1. Given the answers to your Career Assessment, what career are you planning to consider?

Software Engineering and Server Administrator.

2. What factors do you consider in choosing the right career for you?

Based on the previous modules, I based my chosen career that I think is right for me based on how it can help my family, what I can do for my society, economy, my interest, skills, and

3. How do you feel about deciding on your future career?

I feel uncomfortable in deciding it as I am still in my very early part of my life. Slowly but surely I'll get comfortable in my decision but I am certain that this will be my future career.

What I have Learned

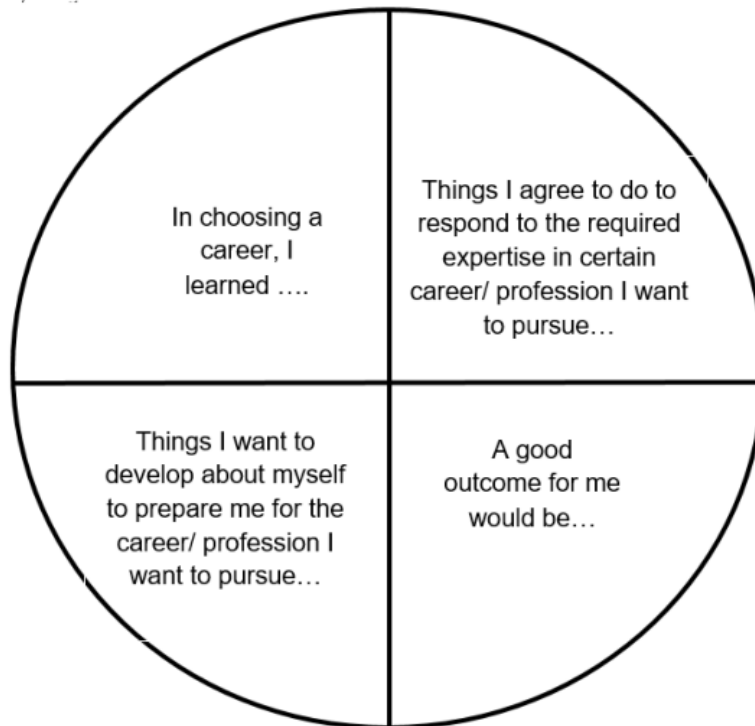

Suggested Time Allotment: 20 minutes

"Career Reflection"

As a Grade 10 student, you will be making a major decision in choosing your career. It is important to reflect to have a clear view of your career plan.

1. Copy and complete the activity on a clean sheet of paper.

2. Draw a circle and divide it in four part. Then, accomplish the task for each quadrant.

In choosing a career, I learned that there's a lot of factor to choose in and it's an important decision in your life as this will determine what your future job will be. Factors like the importance of this to your family, what this career can do to help our society, economy, your interest and skills, aswell as the income that this will generate to supplement you with resources formy future.

Things I agree to do to respond to the required expertise in certain career/profes-
sion I want to pursue are the skills needed for my job such as critical thinking, problem
solving, logical reasonings, and etc. I would like to enhance them when I have the time
to.

Things I want to develop about myself to prepare me for the career/profession I
want to pursue are soft skills such as communication. Communication is an important
part in any jobs, not just specifically mine.

A good outcome for me would be to get a job in a big tech company that will
impact our society massively as many people tend to rely on technology this days.

Share your Thoughts & Feelings

Suggested Time Allotment: 30 minutes

Your family have a great influence in your choice of career. They are considered as one of your influencers when it comes to career decision making. Invite your family members for a “kwentuhan” session. Discuss with parents and other family members about your possible profession in the future. Ask them what they will recommend to you? You may also consider asking them on what career or profession they would want you to pursue.

Note: translated to english for ease of understanding. Mom: I think it would be better if you try to choose a career based on your interest and skills. From what I've seen, I think it should be IT but it's up to you. I would not pressure you in your future career as it is an important decision to make. However, I will support you in your decision in any way I can so long as it's reasonable.

Sister: I'm not sure if I should even recommend anything as I'm still younger than you. However, just like mom, I would support you in any way I can. Be sure to help me though in paying my tuition fee with your chosen job.
