

Angeles City Science High School
Homeroom 10

Name: Paul Gerald D. Pare

Section: 10-Hawking

Let's Try This

Suggested Time Allotment: 5 Minutes

Directions: Ask help from a family member. He or she will be your partner for this activity. He or she could be your father, mother, a sibling, or your guardian. Share your Senior High School plans and choices with your partner and after which, answer the processing questions in a clean sheet of paper.

Processing Questions:

1. How did you feel with the decisions and choices you made?

I feel like I can be more confident with my decision as I have shared them to my close ones.

2. With the choices you made, what are the factors that you considered in making these choices?

The value of my career in the future, it's purpose in our community, and benefits of it for me and my family.

3. Who are the significant person/s in making these decisions and choices?

My mom, cousin, and friends.

Let's Explore This

Suggested Time Allotment: 5 Minutes

Activity 1:

Think of two (2) individuals who are successful in their own profession. These persons are not limited to famous personalities but also persons whom you know personally (i.e., parents, Tito or Tita, Lolo or Lola, or individuals who are successful in their own field). In a clean sheet of paper, make a reflection based on the processing questions given below. - Adrian Pare (college student at computer science) - Luke Smith (multiple jobs but one of them is teaching about how to be efficient and effective in computer science)

Processing Questions:

1. What is the profession / vocation / career of these persons?

For Adrian, my cousin, he is currently a college student that studies computer science. For Luke Smith, he has a lot of jobs but one of the most significant ones is creating content in YouTube to teach hundreds of thousands on how to be efficient and effective in using our computers.

2. Why do you consider them successful?

Because many people adore them because of their skills, knowledge, and talent

that results in inspiring more people to take computer science.

3. Do you think their qualities are essential to become successful? Why and why not?

I don't think all of them do, however, inspiring people because of what you love to do is a great thing to have.

Activity 2:

Directions: In a clean sheet of paper, paste or copy from a reliable source with reference about the career you have chosen. Include factors such as how they do the work, how much is the salary and the job availability. Finally, make an insight paper and answer the processing questions in the same sheet of paper.

Source: https://www.glassdoor.com/Salaries/developer-rust-salary-SRCH_KO0,9_KE10,14.htm

Processing Questions:

1. What are your thoughts while doing the research?

High salary and a high demand job.

2. How did you feel about the career you chose?

I feel confident about my choice.

3. What are your plans for learning more about your chosen career?

Since programming can be self learn, I will self learn my way and try to understand difficult topics by myself.

You Can Do It!

Suggested Time Allotment: 10 Minutes

Direction: You are to fill out the Senior High School Preference Slip

What I Have Learned

Suggested Time Allotment: 5 Minutes

Directions: Answer the following questions in your HG notebook.

1. If you want to take up Bachelor of Science in Criminology, what SHS Track or Strand will you take?

Humanities and Social Sciences

2. Give at least one (1) strand in Technical Vocational Livelihood (TVL)

Information and Communication Technology

3. Give at least two (2) Strands in Sports Track

Athletics and Fitness

4. If you want to take up a Bachelor of Science in Music, what SHS Track or Strand will you take?

Arts and Design Track

5. If you want to take up a Bachelor of Science in Agriculture, what SHS Track or Strand will you take?

Technical Vocational Livelihood

Share Your Thoughts and Feelings

Suggested Time Allotment: 5 Minutes

Direction: On a clean sheet of paper, write your reflection on the learnings

In this module, I have learned the different tracks and careers that you could get if you chose a specific strand in senior high school or course in college. My career choice is in the Technical Vocational Livelihood - Information Communication and Technology.
