A Purpose-Driven Career

Before you embark on any journey, you must first identify your purpose leading to your destination. This activity will help you realize the meaning of your career choices.

1. Copy and complete the activity on a sheet of paper.
2. List down at least three career options or desired professions that you currently have in mind. Then, reflect and identify the significant reasons why you intend to pursue that career. Refer to an example provided.

My career options:	My purpose of choosing this career:
Software Engineer	Since the pandemic, everyone uses technology daily because we can't communicate or do certain things outside of our home. Technology can't be avoided nowadays and so I want to help people by developing applications that may help them in their day-to-day basis.
Chef	It has been in my interest to cook for other people. It is fun to create dishes for other people.
Server Administrator	Just like the first one, this helps not the people directly but rather the developers. Administrating a server is really crucial in keeping up the program to be accessible by everyone.

Processing Questions:

1. Did you find it difficult/easy to decide on your career options? Briefly explain your answer.

I find it easy to decide on my career options as the previous modules already helped me chose on what my future job should be.

2. What is the importance of realizing the reason and significance of your career choices?

You should not choose your future career based on peer pressure, family pressure, or because of how much a job makes. You should know the significance of your future career/s and what it can do to help other people. It's also a good idea to choose future careers that will make you happy or something that you have the skill and interest in.

Clusters	Number of statements that applies to me:
A: ARTS AND DESIGN	5
B: SPORTS	4
C: TECHNICAL-VOCATIONAL AND LIVELIHOOD	8
D: ACCOUNTANCY, BUSINESS AND MANAGEMENT	9
E: SCIENCE, TECHNOLOGY, ENGINEERING, AND MATHEMATICS	12
F: HUMANITIES AND SOCIAL SCIENCES	6

Processing Questions:

1. What are the top three clusters with the greatest number of statements that apply to you?

Science, Technology, Engineering, and mathematics or STEM, Accountancy, Business and Management or ABM, and lastly, Technical-Vocational and livelihood or TVL.

2. What did you discover more about your career interests while completing the activity?

Even though TVL will be my track and is the correct track to be in when dealing with technical skills such as programming, I did end up with STEM or Science, Technology, Engineering and Mathematics to be the highest cluster that applied to me.

"Career Road Map"

1. Referring to the result of your previous activity in Career Interest Clusters and using the Career Wheel as your guide, map out your career pathway.
2. Copy and answer the activity on a sheet of paper.

Career Cluster	Potential Careers/Business:
Science, Technology, Engineering, and Mathematics	<ul style="list-style-type: none">- Data Scientist- Researcher- Data Analyst
Accountancy, Business and Management	<ul style="list-style-type: none">- Sales Manager- Internal Auditor- Accounting clerk
Technical-Vocational and Livelihood	<ul style="list-style-type: none">- Software Engineer- Server Administrator- DevOps

Processing Questions:

1. What particular career cluster/options will you most likely to pursue? Briefly explain your answer.

I would like to pursue the Technical-Vocational and Livelihood, specifically the TVL-ICT strand. It has always been in my interest and so I have gained experience in different aspects of ICT such as programming, networking, and server management.

2. What is the importance of knowing and planning your career path?

It is important to know and plan beforehand your career path as this will determine what your strand in senior high school and course in college will be. If you can't determine, know, and plan then you might waste time and money in learning something that you won't be able to apply in your future career.

What I have Learned

"Career Check!"

Answer the following questions on a sheet of paper:

1. What is the significance of my career choice in my life?

My career choice will determine my future career and this will shape up my desired daily life that I want to pursue in the future.

2. What are the characteristics of this career that are meaningful to me?

One of the most important characteristic is that it interested me in that career. The characteristics of this career is that it is for people that have logical skill, has knowledge in mathematics and can understand complex algorithms, and most importantly is the ability to solve a problem or must have problem-solving skill. It is mostly for people that is detailed-oriented, critical thinker, problem solver, and has a little bit of creativity into them.

3. What are the most important characteristics of this career that define me as a person and a worker in the future?

It defines me as a detailed-oriented, critical thinker, problem solver, creative, logical and reasonable person. These characteristics make up for a good ICT worker in any jobs within the field.

Share your Thoughts & Feelings

Suggested Time allotment: 10 minutes

Taking down note of every learnings you have is a good practice. In a sheet of paper, write your reflections of the activities conducted.

After going through all the activities, I realized that I should know and plan out what will be my future career. Determining my future career through career choice is a crucial step going through life. This will pretty much shape our future and what would be our daily lives until the day we retire and become old. We must not be pressured by our peers or family into choosing our future career through career choice nor we should determine our job by its salary. We should select our future career through interest, passion, skills, and what good it will do to our society.
