

Angeles City Science High School  
Homeroom 10

Name: Paul Gerald D. Pare

Section: 10-Hawking

## Let's Try This

**Suggested Time allotment:** 15 minutes

The different career activities provided for you in the previous modules may have helped you to personally decide on your career to pursue. The activity that follows will allow you to plot your chosen career and see how it will possibly affect your family, the societal needs and eventually have its impact on the global economy. Below are instructions that will guide you on how to do it.

1. In a clean sheet of paper, draw a diagram that will serve as your guide.
2. Answer the questions in each box. Make enough space for your answer.
3. Refer to the example below.

### My Career Contribution to My Family, Society and Economy

#### My Chosen Career/Profession

Software Engineer

#### How can I help my Family through my Career/Profession?

Since the job or career that I choice is relevant and in demand in our current era, it would help my family with the stable income as well as improve their experience if they are consuming the software that I'm developing or working.

#### How can I possibly respond/contribute to the needs of the Society?

By improving the experience of the user in the software that I'm developing. Asking them through a survey can help me understand on what they really want in the software that they use.

#### How can I share to the Global Economy?

I will spend my working hours productively and pay the services that I used especially the servers, database, and etc honestly. I would also pay taxes honestly as a good citizen of this country.

### Processing Questions:

Answer the following questions at the back of your output for submission to your adviser.

1. What are your realizations after accomplishing the activity? Write a short reflection or your thoughts about the activity.

I realize that our career's main purpose is to help other people in our community. Additionally, we will also help the economy of our country.

### Let's Explore This

**Suggested Time Allotment:** 10 minutes

For a deeper appreciation of your realizations in the previous activity, you will write a short poem entitled "I AM PROUD TO BE A FUTURE (write your Career/Profession)" on a clean sheet of paper. This will not be as hard as you think because you will just write in each stanza the answers you gave in the beginning activity. You are encouraged to change some words to create a rhyme and make your poem the best that you can make. Also, you can include the reflections you made as it expresses your inner self. Refer to the instructions and the example that follows.

#### **I am proud to be a future Software Engineer**

Based on my interest and skills, I chose my future career  
to become a software engineer.  
Having a stable income makes my family,  
delight and happy.

As part of my job,  
I have to survey people but not rob  
their privacy as I would request for consent.  
Purpose of this is for experience improvement.

To be a good citizen of this country,  
I would pay taxes honestly.  
I will spend my time productively,  
and pay for the services that I use truthfully.

### Processing Questions:

1. How do you feel after writing your own poem that reflects your own contribution to your family, the society, and the economy? Write your thoughts in your HG Notebook.

I feel obligated to accomplish and be honest on what I should do for our country. Our jobs are not just for ourselves but it also helps our country as well as our family.

and society.

## You can Do It

**Suggested Time Allotment:** 10 minutes

In your Homeroom Guidance Notebook, make a personal plan on achieving your career goal based on the table below.

<b>My Future Career</b>	<b>My Personal Goals</b>	<b>Things I want to do For My Family</b>	<b>My way of responding to the need of the society</b>	<b>Things To Do To Contribute To Global Economy</b>	<b>My Commitment to do it</b>
Software Engineer	To join a big tech company	I want my family to enjoy their lives with the stable income that I will be getting.	To improve the experience of the users that utilizes our software and make their lives easier with the help of technology.	Pay the taxes and services as honestly as I could be. I won't be pirating as this violates the hard-work of the developers of these services.	I will not quit my job and will help people no matter how hard the situation can be.
Chef	To have a restaurant that inspired me.	Aside from stable income, I also want them to enjoy the food that I cook for them.	I will serve my society by serving them enjoyable and healthy foods.	I'll accept imported ingredients but also export products to other countries.	Even though this is not the main career that I pursue, I would like to serve the society directly by serving them the food that they need and help poor people.
Server Administrator	To maintain servers from big tech companies	I want to help my family in their needs especially my younger sister as I want to help her in her upcoming college.	My contributions indirectly help the society as I help the developers which improve the experience of users in a software.	I can help the economy by accepting request from other company with the cooperation from my work.	I will try to cooperate with other companies from the work that I've done in administrating our servers.

**Processing Questions:**

Choosing a career or profession for your future involve careful planning. Allong with it is not just yourself. It includes your family and the societ where you life evolves. Being able to have a clear vision of where you want to go and what you should do is a guide to achieving it.

After a couple of weeks at my work, I would like to thoroughly help my sister in her way to college. By giving her the money required for tuition fee. I would also like to give 30-40% of the salary that I earn to my family as I owe them a lot since the beginning. I will then invest my money to stocks or cryptocurrency to prepare for emergency or retirement plan.

**What I have Learned**

**Suggested Time Allotment:** 5 Minutes

From everything that we had, ponder upon these and answer them on your Home-room Guidance Notebook:

1. How can I better prepare myself for the career/profession that I intend to take?

I would like to experience the things that we do in our career. In my preferred career choice, I would like to be a software engineer and I intend to learn programming and make it a hobby. It really is fun to do programming from time to time as if you achieved something worth it.

2. Now that I realized the effects of my career choice to my family, needs of the society and global economy, what should I do to make it a reality?

To make it a reality, I would plan it out and do the things that I've mentioned in the first question. Learning programming and making it a hobby is just a way for me to be comfortable in my future career. Learning soft skills on the other hand such as cooperation, social skills, trust and honesty, etc. can make me a better person in general and I would be able to take action on those three categories.

## **Share your Thoughts & Feelings**

**Suggested Time Allotment:** 5 Minutes

Write your answer in your HG Journal Notebook.

Close your eyes. Imagine yourself 7-10 years from now. Reflect on your future career or profession. How do you see yourself? How are you able to contribute to your family and to society?

I see myself as fulfilled as a member of our family, society, and as an individual myself. I feel blessed to be successful in my career choice and responsibly contributing to the society through helping other people by improving their experience in using our software that they use in a daily basis and with that I am able to give my share in the global economy.
